The New Tawaghit and Their Emergency Laws!

The tawaghit are not satisfied with permitting what Allah had forbidden by making up new laws and constitutions that they force upon the masses, claiming that justice is achieved by following this made up system! In fact, every now and then they try to break their own made up laws, and permite what they forbid or forbid what they permitted previously. Thus, they disable some of their laws or all of them by imposing an "emergency state" or "special anti-terror laws" or something else which they make a necessity to allow what their constitutions forbid, not even mentioning Allah's Shari'ah that they have disabled in the first place by those laws.

This is because they will not follow any constitution even if its their own, as they always seek to oppress a little more until everything on this earth belongs to them and they can rule it however they please with their whimsical behavior. What they forbid today they permit tomorrow, and what they permitted yesterday they might punish for today, following the steps of their leader the Pharaoh", as he told the masses: "I do not show you except what I see, and I do not guide you except to the path of prudence" (Ghafir: 29).

And so the "emergency laws" were implemented on people for dozens of years, where the ruling taghut claims that he is in a state of war against the Jews, or that he is under the American threat, or that he is in conflict with the "terrorists", or in a dispute with the "separatists". Therefore, he can unleash with these laws his dogs of security forces and intelligence to consume the people and plant terror in their chests. The people can not disagree with anything the tawaghit and their followers are doing, more so think about fighting them with jihad and jihad, as they had to replace them with Muslim governors. And with those laws that were made up by their desire, the tawaghit allow themselves to take away the dignity and belongings of the people.

Due to this constant state of suppression and terror, the people suffered great harm, until their first demand in all of their protests became to lift this "emergency state" which is imposed on the country before anything else. It is of the tawaghits' malice to use these self-made laws as a sword that they wield against anyone who refuses and does not submit to their ignorant oppressive laws which are written in their constitutions of shirk, and so the removal of these "emergency" laws becomes the best thing the people can hope to achieve, instead of making their sole goal to disregard all of these self-made laws and to believe in Allah's Shari'ah alone, as a faith in their hearts and words on their tongue and actions, and not to settle for anything less.

Following the footsteps of these criminals are the tawaghit who lie and falsely claim to belong to Islam and jihad, as they know no other way of ruling but to copy their taghut ancestors whom they fought to bring down their ruling. As soon as they get a hold of the land, and while people are waiting for them to remove the ignorant shirk and establish the religion of Allah, they announce that they will not be ruling with Allah's Shari'ah, and say that they are in a state of war as an excuse, or that the regions under their control are unstable, or that they are under siege by the enemies.

And with that they disable Allah's Shari'ah and prevent it from being enabled, and impose "emergency laws" that are biased and suits their desires; they even permit "common" laws that any of their administrators declare, or any soldier can follow! The people can only listen and obey, or else they are considered corrupt and must be punished.

It even goes as far as the new tawahit preventing the religion from being established, and preventing the Shari'ah from being applied! And everyone who requests it or invites to it is punished even more by them than what the previous tawaghit had done, who used to declare their enmity for the religion! They add to their kufr and oppression by making the prevention from establishing the religion a part of the religion!! and straying from the Shari'ah a part of the Shari'ah!! by claiming that their crimes are simply their following Allah's commands, like what the pre-Islam mushrikin used to do.

Or they argue to prove their behavior correct by giving examples of other nations before them or contemporary to them, so they are equal to them in their sins. "And when they commit an indecency, they say, 'We found our parents doing this, and God has commanded us to do it'. Say, 'Allah does not command indecencies. Are you attributing to Allah what you do not know?" (Al-A'raf: 28).

This is the state of Muslims in these days; they fought for years to get out of the rule of the European tawaghit, only to be replaced by tawaghit of their own blood that are far worse that the crusaders and more oppressive, and when they fought to bring down the "secular" tawaghit, they fell under tawaghit who claim to support Islam and Muslims! Truly, the faces and names were changed but the facts and rules remained.

It is a duty upon Muslims to fight all of these tawaghit, the secularists or the Islam pretenders, and to bring down their kufr rules of kufr they claim are "Islamic", and so they were commanded by Allah the Highest, until there is no more shirk on earth and obedience is to Allah, the Lord of all creation alone. "And Allah will surelysupport those who support Him. Indeed, Allah is Powerful and Exalted in Might" (Al-Hajj: 40).
